## **DETAILED ACTION**

## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-13 and 21-25, drawn to communication between the measuring device and the camera wherein the communication include operation parameters of each of the measuring device and camera, classified in class 348, subclass 348.
  - II. Claims 14-20, drawn to a system to display an image and the three dimensional measurement area, classified in class 348, subclass 333.03.
- 2. The inventions are distinct, each from the other because of the following reasons:
- 3. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as in any camera in which it is desired to display a measurement area and an image. See MPEP § 806.05(d).
- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
